PROFESSIONAL SUMMARY

Results-driven **Full-Stack Software Developer** and Computer Science graduate with proven expertise in architecting scalable backend systems and engineering high-performance, intuitive user interfaces using modern frameworks such as **React** and **Next.js**. Proficient across full-stack ecosystems including Python (Django, FastAPI), PHP, JavaScript (ES6+), RESTful APIs, and cloud-ready databases. Experienced in delivering end-to-end software solutions—ranging from AI-driven platforms to computer vision analytics—with a strong focus on UI/UX best practices, responsive web application architecture, and reliable system performance.

TECHNICAL SKILLS

Frontend & UI/UX:	React, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Intuitive Web Apps
Backend Development:	Python (Django, FastAPI), PHP, RESTful API Design & Integration, Microservices Architecture
AI & Data Engineering:	Computer Vision (OpenCV), Machine Learning Basics, Intelligent AI Chatbot Integration
Databases:	Relational & Non-Relational Design, Query Optimization, SQL (MySQL, PostgreSQL), NoSQL
DevOps & Tools:	Git, GitHub, CI/CD Pipelines, Linux/Unix, Network Infrastructure & Diagnostics
Soft Skills:	Analytical Problem-Solving, Cross-Functional Collaboration, Technical Systems Training

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer Intern • *Lixnet Technologies Co., Ltd*

- Architected and developed modern, highly responsive frontend web applications leveraging **React** and **Next.js** to deliver intuitive user interfaces and seamless user workflows.
- Designed, developed, and integrated robust RESTful APIs connecting frontend clients with high-performance backend microservices and databases.
- Participated actively in Agile development sprints, code reviews, frontend state optimization, and system testing to maintain clean, scalable codebases.

Industrial Attachment – User & Network Support • *Kenya Airports Authority (JKIA)*

May 2025 – Aug 2025

- Provided critical tier-1 and tier-2 technical support and user assistance to airport personnel, minimizing downtime for mission-critical operations.
- Assisted in station-wide enterprise network configuration, system maintenance, and hardware deployments across infrastructure units.
- Operated and maintained the Flight Information Display System (FIDS) while facilitating technical onboarding for airport staff on upgraded systems.

Industrial Training – Developer & Support • *Masinde Muliro University of Science and Technology*

May 2024 – Aug 2024

- Acquired extensive practical experience in full-stack web development and secure relational database management systems (RDBMS).
- Executed network diagnostics, infrastructure maintenance, hardware troubleshooting, and physical security network setups including CCTV & IP cameras.

KEY SOFTWARE PROJECTS

HealthStack System | *Full-Stack Developer*

- Engineered a full-stack hospital management application to streamline patient records, administrative workflows, and healthcare operations.
- Integrated an interactive, 24/7 AI chatbot to automate initial triage inquiries and appointment scheduling for patients.
- Optimized database query performance to ensure secure, rapid, and compliant access to sensitive medical data.

Smart Barber Counter (Computer Vision) | *Lead Developer*

- Built an automated operational analytics pipeline processing live CCTV video streams for automated shop tracking.
- Programmed computer vision and machine learning models to accurately detect and quantify haircutting operations in real time.
- Automated metric logging by streaming operational output directly to a centralized backend database for business reporting.

EDUCATION

B.Sc. in Computer Science	Graduated
Masinde Muliro University of Science and Technology	
Kenya Certificate of Secondary Education (KCSE) • Grade: B+	2018 – 2022
Nyabigena Boys High School
